colum ID (mm):

Manhole ID (mm):

Tray Numners									
Tray spacing (mm)									
Number of Passes									
Pressure drop/tray (mbar)									
Temperature (°c)									
	Vapor	Liquid	Vapor	Liquid	Vapor	Liquid	Vapor	Liquid	
Flow rate (kg/h)									
Density (kg/m3)									
Viscosity (cP)									
Surface Tension (dyne/cm)									
System Factor/ Foaming tendensy									
Operating Range % (V/L)									

INTERNALS

	Sieve tray	Movable valve tray	Fixed valve Tray	Bubble cap tray	Other Tray
Type of Trays					
Material					

The hydraulic calculation must meet customer needs and for that reason alone it is important to collect all parameters to achieve proper design and optimize. All information that can help us in this process are going. when is an existing column thank you to provide the drawings.
